

7 Lies Of Network Marketing Review

In this 7 Lies Of Network Marketing review I will let you know exactly what I think about Ann Sieg's controversial free report.

Ann's report has sure stirred up some hot responses across the MLM world, especially among those who are dissatisfied with their network marketing business.

If you are struggling with your MLM business, you are not alone! Take a look at these worrying statistics:

- Up to 90% of distributors will quit their business within the first 3 months of starting. Usually this is because they are finding it too hard and expensive.
- Over 95% will give up within the first 12 months.
- Even more worrying, around 80% never sponsor a single new recruit into their business. Most of the others sponsor one or two people who quickly drop out.

If you find these statistics disturbing, you are right to feel that way! Ann Sieg has set out in writing what many experienced MLMers have been afraid to say. She exposes all of the myths that we have been taught (and are teaching our downlines) about how to grow a network marketing business.

When I first heard about 'The 7 Great Lies Of Network Marketing' I will admit that I expected just another MLM basher. In fact, it is not that at all. Ann Sieg is an extremely successful network marketer who has broken through the barriers of the 'lies' that she was taught and gone on to show others how to really make money in network marketing.

Network marketing can be the best way to achieve financial success and independence for many people. And yet, as the statistics show, the great majority fall at the first obstacle. Why? Mainly because we are still being handed down methods that went out of date five or ten years ago.

"There's no selling ... everybody is your prospect ... your business will be built for you ... anyone can do this ..." Do these statements sound familiar? This report exposes them as myths. But successful network marketers do exist - and you could be the next. Start by picking up Ann's free report from the link in the next paragraph.
